FLOATS: The following is a list of the standard categories and general criteria to govern the selection of the recipients:

JUDGING CRITERIA: The panel of judges will base their decision on the following:

- A. TITLE AND THEME: 25% This is the basic idea of the float. By making the basic idea and title conform to the Parade Theme or Fair “atmosphere” it will add to the unity of the parade. The other judging criteria measures how well this basic idea is developed.
- B. INGENUITY: 15%
- C. PUBLIC APPEAL: 15% Public appeal is the enjoyment of the float by the audience. People in our audience are of different age groups and of different backgrounds. Quality in all of the first seven criteria will affect their enjoyment.
- D. CRAFTSMANSHIP: 15% The design will all its ideas, is one part of quality; the other part is craftsmanship. The craftsmanship score will depend on neatness, solid construction, the proper working of mechanical parts and achievement of detail.
- E. PROPORTIONS; BALANCE AND SPACE: 10% Proportion is the size relationships among the features of the float. However, the basic idea of the float may call for intentional lack of proportion. Balance and space take in two questions; Is the overall design graceful or clumsy? Is the space of the float used to support the basic idea, or is it wasted?
- F. COLOR: 10% Color brings up two questions; Are the colors and their combinations pleasing? How well do they contribute to the desired effect?
- G. ANIMATION AND SOUND EFFECTS: 10% These criteria deal with anything on the float that adds to the total effect of the float. Motion and sound are examples of special effects.
